Justin Boundy

Software Engineer at Advanced Technology Services

Dan strives on team morale. When our department needed to be constructed, Dan worked well in making a solid team and working thru the problems that we had. Dan helped my personal growth and is excellent in solving problems. I would highly recommend Dan for any Development Management position in any company.

July 11, 2015, Justin reported to Dan at Advanced Technology Services

David Sendelbach - Software Developer

Software Developer and Consultant

Dan is the best manager I've ever worked for without question. Dan leads by leveraging the strengths of the people around him and encouraging personal growth for everyone on his team. Dan would be a strong asset for any organization.

March 22, 2015, David reported to Dan at Advanced Technology Services

Joshua Stella

Software Engineer II at Advanced Technology Services

Dan is one of the best bosses I've ever had. He is an outgoing people person who always makes you feel like you are an important member of the team. I greatly enjoyed my time working with him and hope I can work with him again in the future.

March 18, 2015, Joshua reported to Dan at Advanced Technology Services

Rebecca Hohenbery

Software Engineer at Advanced Technology Services

Dan is an awesome boss to work for. I have worked with him for about 6 years. He gave me my first IT job and helped me to become a good developer. He is very caring and understanding. If you have an issue at work, he would do anything to help you. He was always available any time of the day. Dan will be sorely missed.

Lisa Frederick

System Administrator

Once Dan left Pekin Hospital, my department realized how much we missed of his management and leadership skills, not just in the department but across the hospital. In healthcare and our economy today, we are understaffed but projects were always mounting. Dan did a great job of trying to keep us focused on what we had to work on in front of us. He helped with our system downtimes, which I like in a leader that he can step into our shoes and help out. If I ever needed him for something, he always made the time so I could step into his office. He played therapist at times but was also honest and provided helpful critique. He gave me a thorough annual review which I appreciated because as an employee I feel it helps you grow when you know what you need to work on in your career. Dan was great at seeing the big picture, and when he was here he led and pushed to get major infrastructure upgraded so we could provide stability and efficiency to the hospital.

March 4, 2014, Lisa reported to Dan at Pekin Hospital

Matthew Frauenhoffer

IT Systems Analyst at Pekin Hospital

The first thing that struck me about Dan was his dedication to our team. While the time that he was my director was short, I was continually impressed with how he handled the multiple requests for his time. No matter what time it was, he would make himself available to you if you needed someone to talk to and bounce ideas off of. Dan's technical skills are also very impressive and he was always willing to throw in a hand if you needed it. I considered it a privilege working with Dan and I hope our paths cross again in the future.

February 26, 2014, Matthew reported to Dan at Pekin Hospital

Aaron Sherman

Network Engineer at Heart Technologies, Inc.

Dan was one of the best managers I've had the pleasure of working with. He is especially skilled in making his team look good to the business, always talking us up and making sure everyone knew just how hard we work behind the scenes.

He also was great at insulating us from the politics inherent at every company. He would always run interference for us to keep "project creep" from becoming a problem. You don't realize how important this is until it is gone! One of the biggest perks of working for Dan is that he is very flexible. He understands that life happens outside of work, and will go to any lengths to arrange time away as needed. Additionally, he understands the value of ongoing training, and fights to get that budget approved!

Above all, Dan is a very honest and genuine person. He is always very up front about his expectations, and will tell it like it is.

I hope to be able to work with Dan again in the future!

December 1, 2013, Aaron reported to Dan at Pekin Hospital

David Van Dyke

PC Technician at Dewberry

Dan has worked in IT as long as anyone I know. He is a long time friend of the family. He is kind, generous and passionate. Congratulations on the new job Dan.

David Van Dyke

August 12, 2008, David worked with Dan at Pekin Hospital

Julie Bonn Blank

Community Outreach Director at West Suburban Wellness

Dan is an excellent musician and creative individual. He cares about his results and his reputation. Customer service and responsiveness is very important to him and this shows in all that he accomplishes. Julie Bonn Heath

July 19, 2008, Julie was Dan's client

James Richardson

IT Manager at Cox Transfer

Dan Tharp worked for me for 7 1/2 years as the Development Manager of our TS (Technology Services) Department. Dan was my first hire following my acceptance of the CIO position at G&D Integrated. Over the years, Dan and the team he recruited developed many solutions that supported G&D in achieving and maintaining competitive advantage and differentiation. These solutions covered EDI, B2B/B2C, web based applications, and other key areas. Dan is very effective at the management of developers, working with IT/non-IT personnel, platform selection and standardization, and ensuring that his employer meets its strategic goals from technology and efficiency perspectives.

July 19, 2008, James managed Dan at G&D Integrated

Thomas Schael

Consultant - Web Developer at Integrys Energy Group

Dan is an excellent developer and has a history of consistently delivering a first rate product to the client the first time. His communications skills are excellent and I would recommend him for any position he applies for. He's also a great friend.

February 10, 2009, Thomas worked directly with Dan at Software Architects Inc.

Recommendations/reviews from ZipRecruiter.com:

Billy Beach - Application Development Manager at G&D Integrated

Dan was my boss for quite a few years, and I was always greatly impressed at how talented of a programmer he was, and how passionate he could be at doing his job. Beyond that though, he was also my mentor, and I owe a huge amount of my professional success to his tutelage.

Bill Schisler - Operations Support Team Lead - Development at Productive Programming Inc.

Dan was the best development manager that I have ever worked for. I was lucky enough to have Dan as manager twice in my career. His knowledge and leadership abilities are well above average and I have not met his rival yet. When it comes to getting the most out of his employees and mentoring them, Dan is head and shoulders above other managers that I have worked for.

David Sendelbach - Programmer/Technical Trainer at Pearl Insurance

Dan was one of the best supervisors I ever worked with. Very hard worker and cares about his employees. Super easy to work with.

Joshua Stella - Software Engineer at Satcom Direct

Daniel was my direct supervisor at my previous position. He has a talent for managing teams and utilizing individuals talents. I genuinely like Daniel on both a professional and personal level.

James Richardson - IT Manager at Cox Transfer

I held the position of CIO at G&D Integrated in Morton, IL from 2000 to 2013, Dan worked for me as our Application Development Manager which involved the management of a team of three Application Developers. Dan developed applications and performed EDI programming while managing his team. He was very effective at meeting deadlines and producing creative and innovative applications which allowed G&D Integrated to achieve greater competitive differentiation.

Justin Allen Boundy - Software Engineer at Advanced Technology Services

Dan was an exceptional manager in our group. Bringing together talent and building a team from nothing.

Aaron J Sherman - Network Engineer at Heart Technologies Inc.

Dan was my manager at Pekin Hospital in the IT Department. Dan was always available to discuss problems and issues, or just be a friend to lend an ear. He did a good job of running interference when needed, and overall was a good boss.
